EDUCATION

KCC Institute of Technology and Management **Sep 2022 – June 2026**
B.Tech(CSE-AI ML) - ***7.55*** *Greater Noida, Uttar Pradesh*

Maharaja Agrasen Public School **March 2020 – April 2022**
Secondary Education (12th Grade)- - ***Percentage - 95%*** *Khurja, Uttar Pradesh*

COURSEWORK / SKILLS

- Data Structures & Algorithms
- Python and Libraries
- SQL and Power BI(Basic)
- Machine Learning
- Artificial Intelligence
- OOPS Concept
- Data Science
- Java core

PROJECTS

Plant Disease Detection with Grad-CAM | Python, CNN, Transfer Learning, OpenCV **June 2025**

- **Developed a deep learning model** for plant disease detection using CNN and transfer learning to classify leaf images accurately. .
- **Applied image preprocessing and data augmentation** techniques to improve model generalization and performance.
- **Implemented Grad-CAM** for visual interpretability, highlighting affected regions in plant leaves.
- **Built an end-to-end pipeline** for disease prediction, enabling early detection and supporting agricultural decision-making.
- Live site here

AI Stock Price Prediction System | Python, LSTM, GRU, ARIMA, Pandas **Jan 2026**

- **Developed a hybrid prediction model** using LSTM, GRU, and ARIMA for accurate stock price forecasting.
- **Performed time series preprocessing** including data cleaning, feature engineering, and normalization on historical stock data.
- **Visualized predicted vs actual trends** to evaluate model performance and improve forecasting accuracy.
- Live site here

Deloitte Australia Data Analytics Job Simulation on Forage | Data Science **March 2026**

- **Completed a Deloitte Data Analytics simulation** involving real-world data analysis and forensic technology use cases.
- **Designed interactive dashboards** using Tableau to visualize key insights and support data-driven decision making.
- **Performed data classification and analysis** using Excel to identify patterns and derive meaningful business conclusions.

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, C++,HTML
Libraries/Tools: NumPy, Pandas, Matplotlib, Seaborn, Jupyter
Technologies/Frameworks: Machine Learning, Deep Learning, CNN, LSTM, Data Analysis
Developer Tools: VS Code, Git, GitHub, Tableau, Power BI, MySQL

ACHIEVEMENTS

- **Led a team in Smart India Hackathon** and qualified for the second round by developing a virtual herbal garden solution.
- **Completed Java with AI training** by HCL Technologies, covering Java fundamentals, AI concepts, and ML model integration.
- **Developed multiple ML/DL projects** including plant disease detection and stock prediction systems solving real-world problems.
- **Demonstrated strong analytical skills** through data analysis, visualization, and problem-solving using Python and SQL.
